Vanguard ESG Developed Europe Index Fund

EUR Acc

Inception date: 29 June 2010

Total assets (million) €628 | Share class assets (million) €350 as at 31 December 2025

Minimum initial investment	ISIN	SEDOL	Bloomberg	Investment structure	SRI*	Index ticker	Domicile	Settlement	Trading frequency (cut-off)
€1,000,000	IE00B526YN16	B526YN1	VGSESIE	UCITS	4	FGCDENE	Ireland	T+2	Daily (11:00 Irish Time)

Ongoing Charges Figure* 0.14 %

*The Ongoing Charges Figure (OCF) covers administration, audit, depository, legal, registration and regulatory expenses incurred in respect of the Funds.

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the FTSE Developed Europe Choice Index (the "Index").
- The Index is a market-capitalisation-weighted index composed of large and mid-cap stocks of companies located in developed markets in Europe. Market-capitalisation is the value of a company's outstanding shares in the market and shows the size of a company.
- The Index is constructed from the FTSE Developed Europe Index (the "Parent Index") which is then screened for certain environmental, social and governance (i.e. controversy-related) criteria.
- Through the screening out of stocks of companies from its portfolio based on the potentially detrimental impact of their conduct or products on society and / or the environment, the Fund promotes certain environmental characteristics and social characteristics relating to social norms and standards.
- The Fund attempts to: 1.Track the performance of Index by investing in all, or substantially all, of the constituent securities of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process. 2. Remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Index methodology excludes stocks of companies that the sponsor of the Index determines (a) to be engaged or involved in specific activities of the supply chain for, and / or (b) derive revenue (above a threshold specified by the Index provider) from, certain activities relating to the following activities: (a) Vice Products (i.e., adult entertainment, alcohol, gambling, tobacco, cannabis); (b) Non-Renewable Energy (i.e., nuclear power, and fossil fuels (including power generation from oil, gas, and thermal coal which includes: (i) companies that have greater than 50% ownership of companies that own proved or probable reserves in coal, oil or gas, (ii) oil and gas production and supporting services, (iii) coal extraction, production and supporting services, (iv) oil and gas and thermal coal power generation, (v) extraction of arctic oil and gas, and (vi) extraction of oil sands)); and (c) Weapons (chemical & biological weapons, cluster munitions, anti-personnel landmines, nuclear weapons, civilian firearms, and conventional military weapons).The Index provider defines what constitutes "involvement" in each activity. This may be based on percentage of revenue or any connection to a restricted activity regardless of the amount of revenue received, and will relate to specific parts of the supply chain.
- Company product and conduct involvement is monitored on a yearly basis by the Index provider and as new data is made available to the Index provider.
- For the full investment strategy please review the prospectus.

Vanguard ESG Developed Europe Index Fund

EUR Acc

Performance summary

EUR—Vanguard ESG Developed Europe Index Fund

Benchmark — FTSE Developed Europe Choice Index - Performance was achieved under circumstances that no longer apply. The benchmark index tracked by the Fund changed with effect from 24 June 2024. Past performance data for each year to 2013 shown in the past performance chart therefore relates to performance of the Fund when tracking the old benchmark index, i.e. the FTSE Developed Europe Index and the performance of that index is also included in the bar chart next to the bar chart showing the performance of the Fund for that period. Past performance data from 2024 onwards will relate to the FTSE Developed Europe Choice Index.

Annualised performance**	1 month	Quarter	Year to date	1 year	3 years	5 years	10 years	Since inception
Fund (Net of expenses)	3.14%	6.96%	17.61%	17.61%	14.19%	10.85%	7.59%	8.44%
Benchmark	3.15%	6.94%	17.27%	17.27%	13.91%	10.62%	7.47%	8.40%

****The performance data shown represent past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, so investors' shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data cited. For performance data current to the most recent month-end, visit our website at vanguard.com/americas.**

In this document the performance displayed for the Fund(s) and therefore relative performance to the benchmark index may be impacted by swing pricing. The NAV of a Fund may swing according to subscription/redemption activity so that transaction costs caused by these cashflows are not borne by the existing holders in a Fund. The benchmark index is not affected by swing pricing and therefore you may see tracking difference between the performance of the Fund and the benchmark.

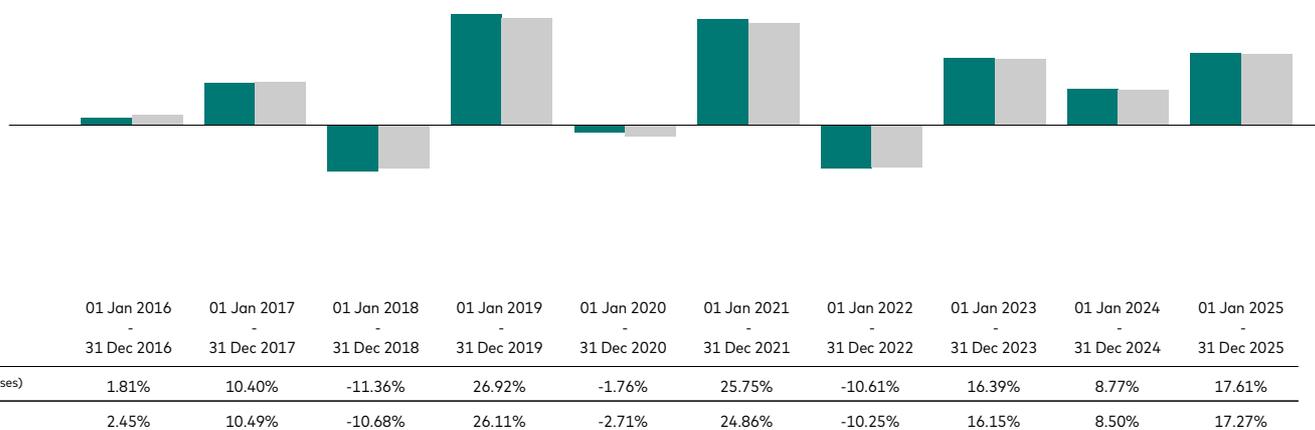

The performance of an index is not an exact representation of any particular investment, as you cannot invest directly in an index.

Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Performance figures include the reinvestment of all dividends and any capital gains distributions. The performance data does not take account of the commissions and costs incurred in the issue and redemption of shares. Basis of fund performance is NAV to NAV. Basis of index performance is total return. All performance is calculated in EUR, net of fees.

Performance and Data is calculated on closing NAV as at 31 December 2025

Rolling 12-month performance

Key investment risks

The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events. Movements in currency exchange rates can adversely affect the return of your investment.

Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.

Please also read the risk factors section in the prospectus and the Key Information Document, both of which are available on the Vanguard website.

Vanguard ESG Developed Europe Index Fund

EUR Acc

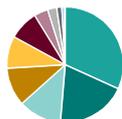

Data as at 31 December 2025 unless otherwise stated.

Characteristics

	Fund	Benchmark
Number of stocks	404	390
Median market cap	€57.8B	€70.7B
Price/earnings ratio	17.2x	17.2x
Price/book ratio	2.4x	2.4x
Return on equity	13.1%	13.1%
Earnings growth rate	14.3%	14.3%
Turnover rate	-18%	—
Equity yield (dividend)	2.9%	2.9%

The PTR (Portfolio Turnover Rate) approach considers the total security purchases and sales, the total subscriptions and redemptions and the average net assets of the fund to calculate the turnover figure. Data as at 31 December 2025.

Weighted exposure

Financials	31.8%	Telecommunications	3.8%
Health Care	19.6	Basic Materials	2.6
Industrials	11.9	Real Estate	1.4
Technology	10.7	Utilities	0.6
Consumer Discretionary	9.0	Energy	0.3
Consumer Staples	8.3		

Sector categories are based on the Industry Classification Benchmark system ("ICB"), except for the "Other" category (if applicable), which includes securities that have not been provided an ICB classification as of the effective reporting period.

Glossary for fund characteristics

The fund characteristics section above contains a number of metrics that professional investors use to value individual stocks against a market or index average. These metrics can also be used to value and compare funds to the market by taking the average of all the stocks held in the fund and comparing them to those of the fund's benchmark index. We've provided a definition of the terms used for your convenience.

Median market cap (capitalisation) looks at all companies in a mutual fund portfolio and calculates the mid point market capitalisation. Market capitalisation represents the aggregate value of a company's stock.

Price earnings ratio (P/E ratio) of a stock is the price paid for a share divided by the annual profit earned by the firm per share. A stock with a price of £10 a share, and earnings last year of £1 a share, would have a P/E ratio of 10.

Price book ratio compares a stock's market value to its book value (the accounting value of a stock). It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

Return on equity is a measure of a company's profitability that reveals how much profit a company generates with the money shareholders have invested.

Earnings growth rate is a measure of growth in a company's net income (what remains after subtracting all the costs from a company's revenues) over a specific period (often one year). Earnings growth can apply to previous periods or estimated data for future periods.

Turnover rate is the total value of sales and purchases of stocks by a fund, less any subscriptions and redemptions monies into or out of a fund, expressed as a percentage of the fund's average value, over a specified period (usually one year).

Equity yield characteristics reflects distributions declared over the past twelve months as a percentage of the mid-market unit price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

Top 10 approximately equals 25.8% of net assets

Data as at 31 December 2025

Volatility

	Fund
R-Squared	1.00
Beta	1.01

R-squared and beta are calculated from trailing 36-month fund returns relative to FTSE Developed Europe Choice Index.

Beta: A comparison of a fund's share-price fluctuations to those of an index. The beta of an index is 1.00. The share price of a fund with a beta of 1.20 will rise or fall 12% when the index rises or falls 10%. For this report, beta is based on returns over the past 36 months. A fund's beta should be reviewed in conjunction with its R-squared. A lower R-squared means less correlation between the fund and the index, and the less reliable beta will indicate volatility.

R-Squared: A measure of how much of a fund's past returns can be explained by the returns from the market in general, as measured by a given index. If a fund's total returns were precisely synchronized with an index's returns, its R-squared would be 1.00. If the fund's returns bore no relationship to the index's returns, its R-squared would be 0.

Climate metrics

The metrics provided in this section are for informational purposes only and should not be considered in isolation, but rather alongside other information about the fund. The information may be useful to assist investors to evaluate the fund's climate risks and opportunities but is not an indication of whether or how the fund takes climate considerations into account. Unless otherwise stated in the fund's prospectus, the metrics are not considered as part of the fund's investment objective, principal investment strategies, or in Vanguard's internal investment decision processes. For more information regarding the fund's investment objective and strategy, please refer to the fund's prospectus.

Metric	Definition ²	Purpose	Fund	Fund coverage ³	Parent benchmark	Parent benchmark coverage
Fund scope 1 emissions (tCO ₂ e)	Direct greenhouse gas (GHG) emissions associated with a fund's investments.	To understand the GHG emissions that occur from sources owned or controlled by the fund's portfolio companies (e.g., emissions from combustion in owned or controlled boilers, furnaces, vehicles etc.).	8,908	96%	—	—
Fund scope 2 emissions (tCO ₂ e)	Indirect GHG emissions associated with the fund's investments.	To understand the GHG emissions from the generation of purchased or acquired electricity, steam, heating or cooling consumed by the fund's portfolio companies (e.g., emissions that physically occur at the facility where the electricity, steam, heating or cooling is generated).	2,863	96%	—	—
Total carbon footprint (tCO ₂ e/\$M invested)	Total carbon emissions for a portfolio normalized by the market value of the portfolio.	To understand how much carbon emissions the portfolio is responsible for per USD 1 million invested. This metric allows investors to compare portfolios of various sizes.	16.34	98%	53.33	98%
Weighted average carbon intensity (tCO ₂ e/\$M revenue).	Portfolio's exposure to carbon-intensive companies.	Reflects the carbon intensity of a portfolio across asset classes (e.g., carbon-intensive portfolios may be more susceptible to climate-related risks, like increased regulations leading to higher costs either via taxation or operational changes).	32.95	99%	87.23	99%

Benchmark exclusions⁵

The benchmark seeks to avoid or reduce exposure to companies based on certain environmental, social, and/or governance criteria. The following section informs investors of the extent to which companies are excluded from the parent benchmark as a result of the index provider's exclusion criteria. The below data may look different from the fund's outcomes depending on the replication and/or sampling strategy.

Exclusion category	Constituents excluded from parent benchmark*	Weight excluded from parent benchmark*	Top 5 constituents excluded (by weight)
Controversies	4	2.59%	HSBC Hldgs, Glencore, Volkswagen Pfd, Volkswagen
Non-Renewable Energy	84	19.99%	Shell, Schneider Electric, Iberdrola, Rolls-Royce Holdings, TotalEnergies SE
Vice Products	15	3.95%	LVMH, British American Tobacco, Anheuser-Busch InBev, Diageo, Imperial Brands
Weapons	23	6.91%	Airbus, Rolls-Royce Holdings, Safran, Compagnie Financiere Richemont SA, Siemens Energy

Source: MSCI as of 22 December 2025.

*Constituents can be excluded under multiple categories and the above numbers are not mutually exclusive.

FTSE is an independent index provider. FTSE excludes companies that they determine engage in the above listed activities, subject to relevant revenue thresholds as disclosed in the fund's prospectus.

Vanguard ESG Developed Europe Index Fund

EUR Acc

As at 31 December 2025

ESG funds are subject to ESG investment risk, which is the chance that the stocks or bonds screened by the index provider for ESG criteria generally will underperform the market as a whole or, in the aggregate, will trail returns of other funds screened for ESG criteria. The index provider's assessment of a company, based on the company's level of involvement in a particular industry or the index provider's own ESG criteria, may differ from that of other funds or of the advisor's or an investor's assessment of such company. As a result, the companies deemed eligible by the index provider may not reflect the beliefs and values of any particular investor and may not exhibit positive or favorable ESG characteristics. The evaluation of companies for ESG screening or integration is dependent on the timely and accurate reporting of ESG data by the companies. Successful application of the screens will depend on the index provider's proper identification and analysis of ESG data.

Vanguard does not provide any guarantee with respect to the quality, accuracy, or completeness of the information provided by Morningstar, MSCI, or FTSE.

1 **Parent Benchmark** refers to the broad market index from which the fund's benchmark is derived, prior to the screening of any environmental, social, and governance criteria.

2 Metrics are aligned to the [TCFD's 2021 implementation guidance](#) and the methodology of the [Partnership for Carbon Accounting Financials \(PCAF\)](#). **Fund scope 1 emissions** are calculated by summing the product of the fund's percentage ownership of each investee company's enterprise value including cash (EVIC) by the investee company's Scope 1 emissions, expressed in metric tons of carbon dioxide equivalent (tCO₂e). **Fund scope 2 emissions** are calculated by summing the product of the fund's percentage ownership of each investee company's EVIC by the investee company's Scope 2 emissions, expressed in tCO₂e. **Total carbon footprint** is calculated by summing the product of each investee company's weight by the investee company's Scopes 1 & 2 emissions, and dividing the summation by the total market value of the portfolio, expressed in tCO₂e per \$1 million invested. **Weighted average carbon intensity (WACI)** is calculated by summing the product of each investee company's weight in the portfolio with that investee company's carbon intensity (derived by dividing the investee company's Scopes 1 & 2 emissions by its revenue), expressed in tCO₂e per \$1 million in revenue.

3 Coverage is defined as the percentage of eligible securities within our funds and benchmarks for which we have obtained carbon data. The development of carbon metrics is in early stages resulting in challenges in interpreting the data and using it as a basis for investment decision making. For example, the metrics are backward looking and do not recognise future plans to reduce emissions. Carbon metrics may also vary due to being normalized by financial metrics that are prone to market volatility, rather than due to changes to the emissions profile of companies.

4 Certain information © 2025 MSCI ESG Research LLC. Reproduced by permission. These metrics were developed using information from MSCI ESG Research LLC or its affiliates or information providers. Although the Vanguard Group, Inc.'s and Vanguard's information providers including without limitation, MSCI ESG Research LLC and its affiliates (each of the aforementioned parties being the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Further, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

5 Refer to the fund's prospectus for more information on the applicable ESG screening methodology.

Important Information

Shares of the Funds are only available for certain non-U.S. persons in select transactions outside the United States, or, in limited circumstances, otherwise in transactions which are exempt in reliance on Regulation S from the registration requirements of the United States Securities Act of 1933, as amended and such other laws as may be applicable. This document does not constitute an offer to subscribe for shares in the Fund. This document should not be provided to retail investors in the United States. In the United States, this document is directed at professional/ sophisticated investors and is for their use and information. The offering or sale of Fund shares may be restricted in certain jurisdictions.

All investing is subject to risk, which may result in loss of principal. Be aware that fluctuations in the financial markets and other factors may cause declines in the value of your account. There is no guarantee that any particular asset allocation or mix of funds will meet your investment objectives or provide you with a given level of income. Prices of mid- and small-cap stocks often fluctuate more than those of large-company stocks. Investments in stocks or bonds issued by foreign companies are subject to risks including country/regional risk and currency risk. These risks are especially high in emerging markets. Funds that concentrate on a relatively narrow market sector face the risk of higher share-price volatility. It is possible that tax-managed funds will not meet their objective of being tax-efficient.

Investments in bond funds are subject to the risk that an issuer will fail to make payments on time, and that bond prices will decline because of rising interest rates or negative perceptions of an issuer's ability to make payments. High yield bonds generally have medium- and lower-range credit-quality ratings and are therefore subject to a higher level of credit risk than bonds with higher credit-quality ratings. Although the income from a municipal bond fund is exempt from U.S. federal tax, you may owe taxes on any capital gains realized through the fund's trading or through your own redemption of shares. For some investors, a portion of the fund's income may be subject to state and local taxes, as well as to the U.S. federal Alternative Minimum Tax. Diversification does not ensure a profit or protect against a loss.

The information contained herein does not constitute tax advice, and cannot be used by any person to avoid tax penalties that may be imposed under the Internal Revenue Code. Each person should consult an independent tax advisor about his/her individual situation before investing in any fund or ETF.
