ETF listed on ASX	24 March 2026
Benchmark information	
Benchmark (Bmk)	FTSE AW Tech 300 Capped Net Hedged AUD
Number of holdings	300

## Investment objective

Vanguard Global Technology Index (Hedged) ETF seeks to track the return of the FTSE All-World Technology 300 Capped 100% Hedged to AUD Net Tax Index (with net dividends reinvested) before taking into account fees, expenses, and tax.

## ETF overview

The ETF provides low-cost exposure to a market-capitalisation weighted index representing the performance of approximately 300 large and mid-cap companies classified as 'Technology' within the Industrial Classification Benchmark (ICB) classification system. The ETF offers a globally diversified approach to investing in the technology sector in developed and emerging markets.

A 20% cap is applied at the company level at each semi-annual index review to mitigate against concentration risk.

As the ETF will largely provide exposure to equity securities, by virtue of the nature of these assets being growth assets, the ETF is likely to be appropriate for consumers who are seeking capital growth. The ETF is hedged to Australian dollars so the value of the ETF is relatively unaffected by currency fluctuations for Australian investors.

## Performance return (%)

	ETF gross	Bmk	ETF total	Distb'n	Growth
1 month	14.10	14.15	14.08	0.00	14.08
3 months	N/A	N/A	N/A	N/A	N/A

31 March 2026	N/A	N/A

## Notes

- A Past performance is not an indication of future performance.
- B Returns assume reinvestment of all distributions. Returns for periods longer than 1 year are annualised. ETF gross returns are before management fees and taxes, but after transaction and operational costs. ETF total return is the ETF gross return less management fees. Index returns do not allow for taxes, management, transaction and operational costs.
- C Returns assume that an investor purchased units at Net Asset Value (NAV) and does not reflect the transaction costs imposed on the creation and redemptions of ETF units, brokerage or the bid ask spread that investors pay to buy and sell ETF securities on the Australian Securities Exchange.
- D Past distributions are not an indication of future distributions. For a full breakdown of the management fees and costs, please refer to the "Fees and costs summary" section of the PDS.

## Top 10 holdings

- NVIDIA Corp.
- Apple Inc.
- Alphabet Inc.
- Microsoft Corp.
- Broadcom Inc.
- Taiwan Semiconductor Manufacturing Co. Ltd.
- Meta Platforms Inc.
- Micron Technology Inc.
- Issuer Not Found
- Advanced Micro Devices Inc.

The top 10 holdings represent 66.9% of the total ETF. Holdings include only the physical securities held in the fund. They exclude cash and derivatives such as total return swaps which may be used to manage exposure levels to certain securities by Vanguard Group globally, or where Vanguard considered it to be in the fund's best interest.

## Sector allocation (%)

	ETF	Bmk
Technology	100.0	100.0
Other	0.0	0.0

Sector categories are based on the Industry Classification Benchmark system ("ICB"), except for the "Other" category (if applicable), which includes securities that have not been provided an ICB classification as of the effective reporting period.

## Glossary

**Weighted Median market cap** is calculated by first ranking all companies in the specified universe in ascending order based on their market capitalisation. The weights of all companies are then summed, and the function steps through the sorted list while keeping a running total of the weights. The value returned by the function as the weighted median value is that belonging to the company straddling the 50% barrier.

**Price/Earnings ratio (P/E ratio)** is a measure of the market value of a share compared to the earnings of the company. A share with a price of \$10, and earnings last year of \$1 a share, would have a P/E ratio of 10. For a fund, the ratio is the weighted average P/E ratio of the shares it holds. In general, a high P/E suggests that investors are expecting higher earnings growth in the future compared to companies with a lower P/E. Companies with negative earnings are excluded from the calculation.

**Price/Book ratio** is calculated by dividing the current market price of the share by the book value per share of the company.

**Return on equity ratio** is a measure of how much profit a company generates relative to its shareholders' equity. For a fund, the ratio is the weighted average return on equity ratio of the shares it holds.

**Earnings growth rate** is a measure of the trailing Earnings Per Share growth for a given company and share. For a fund, the rate is the weighted average earnings growth of the shares it holds.

**Equity yield (dividend)** is the dividend income earned by shares, expressed as a percentage of the market price of those shares. For a fund, the yield is the weighted average equity yield of the shares it holds.
