

Vanguard International High Dividend Yield ETF | VYMI

As of December 31, 2025

Investment approach

- Seeks to track the performance of the FTSE All-World ex US High Dividend Yield Index.
- Employs a passively managed, sampling strategy.
- The fund remains fully invested.
- Large-cap equity, emphasizing stocks located in developed and emerging markets excluding the U.S., that are forecasted to have above-average dividend yields.
- Low expenses minimize net tracking error.

About the benchmark

- The FTSE All-World ex US High Dividend Yield Index is derived from the FTSE High Dividend Yield Index.
- Market cap weighted index that includes large- and mid-cap universe of developed and emerging market stocks excluding the U.S. with the highest dividend yields.
- Excludes REITs, which generally do not benefit from currently favorable tax rates on qualified dividends.
- Uses buffer zones during annual rebalancing to reduce portfolio turnover.

Performance history

Total returns ² for period ended December 31, 2025

VYMI (Inception 2016-02-25)	Quarter	Year to date	1 year	3 years	5 years	Since inception

FTSE All-World ex US High Dividend Yield Index	7.47	38.04	38.04	20.22	13.34	10.96

The performance data shown represent past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, so investors' shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data cited. For performance data current to the most recent month-end, visit our website at vanguard.com/performance. The performance of an index is not an exact representation of any particular investment, as you cannot invest directly in an index.

Price/book ratio	1.6x	1.6x
Return on equity	12.0%	12.0%
Earnings growth rate	12.8%	12.8%
Turnover rate ⁵	8.8	—
Standard deviation ⁶	11.18%	10.96%

1. As reported in the most recent prospectus. A fund's current expense ratio may be lower or higher than the figure reported in the prospectus.

2. Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Fund performance figures assume the reinvestment of dividends and capital gains distributions; the figures are pre-tax and net of expenses. The above widely used comparative index represents unmanaged or average returns on various financial assets that can be compared with the fund's total returns for the purpose of measuring relative performance.

3. As of 4 p.m., Eastern time, when the regular trading session of the New York Stock Exchange typically closes.

4. Effective July 15, 2024, the market price returns are calculated using the official closing price as reported by the ETF's primary exchange. Prior to July 15, 2024, the market price returns were calculated using the midpoint between the bid and ask prices as of the closing time of the New York Stock Exchange (typically 4 p.m., Eastern time). The returns shown do not represent the returns you would receive if you traded shares at other times.

5. For most recent fiscal year. Turnover rate excludes the value of portfolio securities received or delivered as a result of in-kind purchases or redemptions of the fund's capital shares, including Vanguard ETF Creation Units.

6. A measure of the volatility of a fund—based on the fund's last three years of monthly returns—used to indicate the dispersion of past returns. A higher standard deviation means a greater potential for volatility. For funds with less than 36 months of performance history, standard deviation is not calculated.

Technology	2.8
Real Estate	1.3
Other	0.0

1. Represents the expense ratio for the Vanguard ETF as reported in the most recent prospectus. There are material differences between mutual funds and ETFs. Unlike mutual funds, ETFs are priced continuously and bought and sold throughout the day in the secondary market (at a premium or discount to net asset value) with the assistance of a stockbroker, which entails paying commissions. Sources: Lipper, a Thomson Reuters Company, and Vanguard, December 31, 2024.

2. The holdings listed exclude any temporary cash investments and equity index products.

3. Sector categories are based on the Industry Classification Benchmark system ("ICB"), except for the "Other" category (if applicable), which includes securities that have not been provided an ICB classification as of the effective reporting period.

Vanguard ETF[®] shares are not redeemable with the issuing fund other than in very large aggregations worth millions of dollars. Instead, investors must buy or sell Vanguard ETF shares in the secondary market and hold those shares in a brokerage account. In doing so, the investor may incur brokerage commissions and may pay more than net asset value when buying and receive less than net asset value when selling.

All ETF products are subject to risk, which may result in the loss of principal. Investments in securities issued by non-U.S. companies are subject to risks including country/regional risk and currency risk. These risks are especially high in emerging markets.
