Minimum initial investment	ISIN	SEDOL	Bloomberg	Investment structure	SRI‡	Index ticker	Domicile	Settlement	Trading frequency (cut-off)
$1,000,000	IE000QZRRHX6	BN7SC56	VAGSUHA	UCITS	2	H03120US	Ireland	T+2	Daily (16:00 Irish Time)

Ongoing Charges Figure† 0.40 %

†The Ongoing Charges Figure (OCF) covers administration, audit, depository, legal, registration and regulatory expenses incurred in respect of the Funds.

Objectives and investment policy

- The Fund aims to provide a higher total return (capital growth plus income) than the Bloomberg Multiverse Index (the "Index") after the fees and expenses of the Fund.
- The Fund employs an "active management" strategy in aiming to outperform the Index and in doing so, the Investment Manager will follow distinct approaches in managing the Fund's assets.
- The Fund will invest in global fixed income bonds, including fixed and floating rate issues, primarily made up of treasury, government-related, securitised and corporate debt from developed and emerging market issuers. The Fund will primarily invest in investment grade bonds with a rating of the equivalent of Baa3 and above by Moody's or another independent rating agency or, are determined to be of comparable quality by the Investment Manager but may invest up to 25% of its assets in non-investment grade bonds with a rating of the equivalent of Ba1 or below by Moody's or another independent rating agency.
- The Investment Manager may in its discretion restrict the extent to which the Fund's holdings deviate from the Index constituents on a security selection and fixed income sector basis. The Fund may take active fixed income sector views with the focus on bond specific selection. The extent to which the Fund can outperform the Index may be restricted by constraints applied by the Investment Manager which limit the potential volatility of the difference between the return of the Fund and the return of the Index. Such constraints may change or be removed from time to time at the Investment Manager's discretion and depending on market environments.

Performance summary

USD—Vanguard Global Strategic Bond Fund
Benchmark — Bloomberg Multiverse Index Hedged in USD

Sorry, the fund information is not available yet. This will appear after one year from the date of its creation.

Vanguard Global Strategic Bond Fund

USD Hedged Acc

Data as at 31 January 2026 unless otherwise stated.

Characteristics

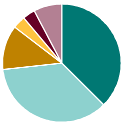
	Fund	Benchmark
Number of bonds	518	35,334
Yield to worst	4.30%	3.76%
Average coupon	3.9%	3.3%
Average maturity	9.0 years	7.9 years
Average quality	A+	A+
Average duration	5.8 years	6.1 years
Cash investment*	-6.7%	—

Market allocation

United States	27.0%		4.9%
Supranational	11.1		4.9
Australia	6.5		4.3
France	5.8		4.0
Canada	5.0		3.5

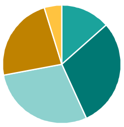
Market allocation displayed equals 77.0%

Distribution by credit maturity (% of fund)



Under 1 Year	-6.5%	20 - 25 Years	3.6%
1 - 5 Years	39.9	Over 25 Years	8.2
5 - 10 Years	38.0		
10 - 15 Years	13.0		
15 - 20 Years	3.7		

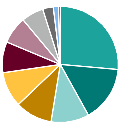
Distribution by credit quality (% of fund)



AAA	14.5%	Not Rated	-7.7%
AA	32.0		
A	31.1		
BBB	24.9		
Less than BBB	5.2		

Credit-quality ratings for each issue are obtained from Bloomberg using ratings derived from Moody's Investors Service, Fitch Ratings and Standard & Poor's. When ratings from all three agencies are available, the median rating is used. When ratings are available from two of the agencies, the lower rating is used. When one rating is available, that rating is used.

Distribution by issuer (% of fund)



Treasury/federal	28.5%	Government-related - agencies	9.4%
Corporate - financial institutions	16.7	Corporate - industrials	8.2
Government-related - local authority	11.5	Government-related - sovereign	6.6
Government-related - supranationals	11.1	Securitised	3.2
Mortgage backed security pass-throug	10.5	Corporate - utilities	1.5

*The allocations are subject to circumstances such as timing differences between trade and settlement dates of underlying securities, that may result in negative weightings. The fund may also employ certain derivative instruments for cash management or risk management purposes that may also result in negative weightings. Allocations are subject to change. Cash includes physical cash on the account, cash like instruments (such as ultra-short term treasury bonds) and derivative instruments.

Glossary for fund characteristics

The fund characteristics section above contains a number of metrics that professional investors use to value individual stocks against a market or index average. These metrics can also be used to value and compare funds to the market by taking the average of all the stocks held in the fund and comparing them to those of the fund's benchmark index. We've provided a definition of the terms used for your convenience.

Yield to worst applies when the portfolio is invested into callable bonds. When it is not the case Yield to worst=Yield to maturity.

Average coupon is the average interest rate paid on the fixed income securities held by a fund. It is expressed as a percentage of face value.

Average maturity is the average length of time until fixed income securities held by a fund reach maturity and are repaid, taking into consideration the possibility that the issuer may call the bond before its maturity date. The figure reflects the proportion of fund assets represented by each security; it also reflects any futures contracts held. In general, the longer the average effective maturity, the more a fund's share price will fluctuate in response to changes in market interest rates.

Average quality is an indicator of credit risk. This figure is the average of the ratings assigned to a fund's fixed income holdings by credit-rating agencies. The agencies make their judgment after appraising an issuer's ability to meet its obligations. Quality is graded on a scale, with Aaa or AAA indicating the most creditworthy bond issuers.

Average duration is an estimate of how much the value of the bonds held by a fund will fluctuate in response to a change in interest rates. To see how the value could change, multiply the average duration by the change in rates. If interest rates rise by 1 percentage point, the value of the bonds in a fund with an average duration of five years would decline by about 5%. If rates decrease by a percentage point, the value would rise by 5%.

Distribution yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of mid-market unit price as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include preliminary charge and investors may be subject to tax on distributions.

Important Information

Shares of the Funds are only available for certain non-U.S. persons in select transactions outside the United States, or, in limited circumstances, otherwise in transactions which are exempt in reliance on Regulation S from the registration requirements of the United States Securities Act of 1933, as amended and such other laws as may be applicable. This document does not constitute an offer to subscribe for shares in the Fund. This document should not be provided to retail investors in the United States. In the United States, this document is directed at professional/ sophisticated investors and is for their use and information. The offering or sale of Fund shares may be restricted in certain jurisdictions.

All investing is subject to risk, which may result in loss of principal. Be aware that fluctuations in the financial markets and other factors may cause declines in the value of your account. There is no guarantee that any particular asset allocation or mix of funds will meet your investment objectives or provide you with a given level of income. Prices of mid- and small-cap stocks often fluctuate more than those of large-company stocks. Investments in stocks or bonds issued by foreign companies are subject to risks including country/regional risk and currency risk. These risks are especially high in emerging markets. Funds that concentrate on a relatively narrow market sector face the risk of higher share-price volatility. It is possible that tax-managed funds will not meet their objective of being tax-efficient.

Investments in bond funds are subject to the risk that an issuer will fail to make payments on time, and that bond prices will decline because of rising interest rates or negative perceptions of an issuer's ability to make payments. High yield bonds generally have medium- and lower-range credit-quality ratings and are therefore subject to a higher level of credit risk than bonds with higher credit-quality ratings. Although the income from a municipal bond fund is exempt from U.S. federal tax, you may owe taxes on any capital gains realized through the fund's trading or through your own redemption of shares. For some investors, a portion of the fund's income may be subject to state and local taxes, as well as to the U.S. federal Alternative Minimum Tax. Diversification does not ensure a profit or protect against a loss.

The information contained herein does not constitute tax advice, and cannot be used by any person to avoid tax penalties that may be imposed under the Internal Revenue Code. Each person should consult an independent tax advisor about his/her individual situation before investing in any fund or ETF.
