*The Ongoing Charges Figure (OCF) covers administration, audit, depository, legal, registration and regulatory expenses incurred in respect of the Funds.

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to provide long-term capital growth by tracking the performance of the MSCI Pacific ex Japan Index (the "Index").
- The Index is comprised of large and mid-sized company stocks in developed markets in the Pacific Region, excluding Japan.
- The Fund attempts to: 1. Track the performance of the Index by investing in all constituent securities of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process. 2. Remain fully invested except in extraordinary market, political or similar conditions.

Performance summary

USD—Vanguard Pacific ex-Japan Stock Index Fund
Benchmark — MSCI Pacific ex Japan Index

Annualised performance**	1 month	Quarter	Year to date	1 year	3 years	5 years	10 years	Since inception
Fund (Net of expenses)	6.88%	7.53%	6.88%	24.29%	9.57%	6.87%	8.90%	7.03%
Benchmark	6.91%	7.58%	6.91%	24.50%	9.74%	7.02%	9.06%	7.09%

****The performance data shown represent past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, so investors' shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data cited. For performance data current to the most recent month-end, visit our website at vanguard.com/americas.**

In this document the performance displayed for the Fund(s) and therefore relative performance to the benchmark index may be impacted by swing pricing. The NAV of a Fund may swing according to subscription/redemption activity so that transaction costs caused by these cashflows are not borne by the existing holders in a Fund. The benchmark index is not affected by swing pricing and therefore you may see tracking difference between the performance of the Fund and the benchmark.

The performance of an index is not an exact representation of any particular investment, as you cannot invest directly in an index.

Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Performance figures include the reinvestment of all dividends and any capital gains distributions. The performance data does not take account of the commissions and costs incurred in the issue and redemption of shares. Basis of fund performance is NAV to NAV. Basis of index performance is total return. All performance is calculated in USD, net of fees.

Performance and Data is calculated on closing NAV as at 31 January 2026

Key investment risks

The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events. Movements in currency exchange rates can adversely affect the return of your investment.

Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

Please also read the risk factors section in the prospectus and the Key Information Document, both of which are available on the Vanguard website.

Vanguard Pacific ex-Japan Stock Index Fund

USD Acc

Data as at 31 January 2026 unless otherwise stated.

Characteristics

	Fund	Benchmark
Number of stocks	93	93
Median market cap	\$61.5B	\$61.5B
Price/earnings ratio	20.1x	20.1x
Price/book ratio	2.1x	2.1x
Return on equity	12.3%	12.3%
Earnings growth rate	7.2%	7.2%
Turnover rate	-27%	—
Equity yield (dividend)	3.2%	3.2%

The PTR (Portfolio Turnover Rate) approach considers the total security purchases and sales, the total subscriptions and redemptions and the average net assets of the fund to calculate the turnover figure. Data as at 31 December 2025.

Weighted exposure

Financials	44.6%	Utilities	3.5%
Materials	14.2	Consumer Staples	2.8
Industrials	9.1	Communication Services	2.7
Real Estate	8.0	Energy	2.2
Consumer Discretionary	7.0	Information Technology	0.9
Health Care	5.1		

Sector categories are based on the Global Industry Classification Standard system ("GICS"), except for the "Other" category (if applicable), which includes securities that have not been provided a GICS classification as of the effective reporting period.

Market allocation

Australia	62.5%
Hong Kong	19.5
Singapore	16.2
New Zealand	1.7

Market allocation displayed equals 99.9%

Glossary for fund characteristics

The fund characteristics section above contains a number of metrics that professional investors use to value individual stocks against a market or index average. These metrics can also be used to value and compare funds to the market by taking the average of all the stocks held in the fund and comparing them to those of the fund's benchmark index. We've provided a definition of the terms used for your convenience.

Median market cap (capitalisation) looks at all companies in a mutual fund portfolio and calculates the mid point market capitalisation. Market capitalisation represents the aggregate value of a company's stock.

Price earnings ratio (P/E ratio) of a stock is the price paid for a share divided by the annual profit earned by the firm per share. A stock with a price of £10 a share, and earnings last year of £1 a share, would have a P/E ratio of 10.

Price book ratio compares a stock's market value to its book value (the accounting value of a stock). It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

Return on equity is a measure of a company's profitability that reveals how much profit a company generates with the money shareholders have invested.

Earnings growth rate is a measure of growth in a company's net income (what remains after subtracting all the costs from a company's revenues) over a specific period (often one year). Earnings growth can apply to previous periods or estimated data for future periods.

Turnover rate is the total value of sales and purchases of stocks by a fund, less any subscriptions and redemptions monies into or out of a fund, expressed as a percentage of the fund's average value, over a specified period (usually one year).

Equity yield characteristics reflects distributions declared over the past twelve months as a percentage of the mid-market unit price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

Top 10 approximately equals 46.4% of net assets

Data as at 31 January 2026

Volatility

	Fund
R-Squared	1.00
Beta	1.00

R-squared and beta are calculated from trailing 36-month fund returns relative to MSCI Pacific ex Japan Index.

Beta: A comparison of a fund's share-price fluctuations to those of an index. The beta of an index is 1.00. The share price of a fund with a beta of 1.20 will rise or fall 12% when the index rises or falls 10%. For this report, beta is based on returns over the past 36 months. A fund's beta should be reviewed in conjunction with its R-squared. A lower R-squared means less correlation between the fund and the index, and the less reliable beta will indicate volatility.

R-Squared: A measure of how much of a fund's past returns can be explained by the returns from the market in general, as measured by a given index. If a fund's total returns were precisely synchronized with an index's returns, its R-squared would be 1.00. If the fund's returns bore no relationship to the index's returns, its R-squared would be 0.

For institutional use only (and not for retail use in the United States).

Important Information

Shares of the Funds are only available for certain non-U.S. persons in select transactions outside the United States, or, in limited circumstances, otherwise in transactions which are exempt in reliance on Regulation S from the registration requirements of the United States Securities Act of 1933, as amended and such other laws as may be applicable. This document does not constitute an offer to subscribe for shares in the Fund. This document should not be provided to retail investors in the United States. In the United States, this document is directed at professional/ sophisticated investors and is for their use and information. The offering or sale of Fund shares may be restricted in certain jurisdictions.

All investing is subject to risk, which may result in loss of principal. Be aware that fluctuations in the financial markets and other factors may cause declines in the value of your account. There is no guarantee that any particular asset allocation or mix of funds will meet your investment objectives or provide you with a given level of income. Prices of mid- and small-cap stocks often fluctuate more than those of large-company stocks. Investments in stocks or bonds issued by foreign companies are subject to risks including country/regional risk and currency risk. These risks are especially high in emerging markets. Funds that concentrate on a relatively narrow market sector face the risk of higher share-price volatility. It is possible that tax-managed funds will not meet their objective of being tax-efficient.

Investments in bond funds are subject to the risk that an issuer will fail to make payments on time, and that bond prices will decline because of rising interest rates or negative perceptions of an issuer's ability to make payments. High yield bonds generally have medium- and lower-range credit-quality ratings and are therefore subject to a higher level of credit risk than bonds with higher credit-quality ratings. Although the income from a municipal bond fund is exempt from U.S. federal tax, you may owe taxes on any capital gains realized through the fund's trading or through your own redemption of shares. For some investors, a portion of the fund's income may be subject to state and local taxes, as well as to the U.S. federal Alternative Minimum Tax. Diversification does not ensure a profit or protect against a loss.

The information contained herein does not constitute tax advice, and cannot be used by any person to avoid tax penalties that may be imposed under the Internal Revenue Code. Each person should consult an independent tax advisor about his/her individual situation before investing in any fund or ETF.
