Ongoing Charges Figure* 0.12 %

*The Ongoing Charges Figure (OCF) covers administration, audit, depository, legal, registration and regulatory expenses incurred in respect of the Funds.

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach, through physical acquisition of securities, and seeks to achieve the performance of the Bloomberg EUR Non-Government Float Adjusted Bond Index (the “Index”).
- The Index is a market-weighted index of euro denominated investment grade fixed-income securities with maturities greater than one year and a minimum issue size of EUR 300 million. The Index includes securities issued by corporate, securitised, and government-related/supranational issuers (including issuers such as the European Union), but excludes eurozone treasury and eurozone government related bonds. The euro zone is all countries in the European Union that have adopted the euro as their currency.
- Through the screening out of bonds issued by corporate issuers from its portfolio based on the potentially detrimental impact of the issuer's conduct or products on society, the Fund promotes certain social characteristics relating to social norms and standards.
- The Fund attempts to: 1. Match the risk factor exposures of the Index by investing in a representative sample of the securities that make up the Index, excluding any securities which do not meet the screening criteria. The screening process seeks to exclude Index constituents that are issued by corporate issuers (including issuers of covered bonds) that (as determined by the Index provider) are involved in: (a) the production of controversial weapons such as cluster munitions, land mines, biological weapons, chemical weapons and/or nuclear weapons; and/or (b) the manufacture of tobacco products. The screening process also seeks to exclude Index constituents that are issued by corporate issuers (including issuers of covered bonds) that have allegedly or actually been directly involved in very severe controversies and/or violations of international norms and principles that have a negative environmental, social and/or governance impact above a particular severity threshold (as determined by the Index provider using a pre-defined, rules-based methodology). 2. Remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- Company product and conduct involvement is monitored on a yearly basis by the Index provider and as new data is made available to the Index provider.

Performance summary

EUR—Vanguard Selected Screened Euro Investment Grade Bond Index Fund
Benchmark — Bloomberg EUR Non-Government Float Adjusted Bond Index

Annualised performance**	1 month	Quarter	Year to date	1 year	3 years	5 years	10 years	Since inception
Fund (Net of expenses)	-0.14%	0.82%	2.55%	1.92%	3.72%	-0.98%	—	0.17%
Benchmark	-0.13%	0.85%	2.61%	2.04%	3.83%	-0.90%	0.72%	0.27%

**In this document the performance displayed for the Fund(s) and therefore relative performance to the benchmark index may be impacted by swing pricing. The NAV of a Fund may swing according to subscription/redemption activity so that transaction costs caused by these cashflows are not borne by the existing holders in a Fund. The benchmark index is not affected by swing pricing and therefore you may see tracking difference between the performance of the Fund and the benchmark.

Performance and Data is calculated on closing NAV as at 30 November 2025.

Past performance is not a reliable indicator of future results.

Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Performance figures include the reinvestment of all dividends and any capital gains distributions. The performance data does not take account of the commissions and costs incurred in the issue and redemption of shares. Basis of fund performance is NAV to NAV. Basis of index performance is total return. All performance is calculated in EUR, net of fees.

Rolling 12-month performance

Key investment risks

The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events. Movements in currency exchange rates can adversely affect the return of your investment.

Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.

Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

Please also read the risk factors section in the prospectus and the Key Investor Information Document, both of which are available on the Vanguard website.

This document is directed at professional investors and should not be distributed to, or relied upon by retail investors.

As at 30 November 2025

ESG funds are subject to ESG investment risk, which is the chance that the stocks or bonds screened by the index provider for ESG criteria generally will underperform the market as a whole or, in the aggregate, will trail returns of other funds screened for ESG criteria. The index provider's assessment of a company, based on the company's level of involvement in a particular industry or the index provider's own ESG criteria, may differ from that of other funds or of the advisor's or an investor's assessment of such company. As a result, the companies deemed eligible by the index provider may not reflect the beliefs and values of any particular investor and may not exhibit positive or favorable ESG characteristics. The evaluation of companies for ESG screening or integration is dependent on the timely and accurate reporting of ESG data by the companies. Successful application of the screens will depend on the index provider's proper identification and analysis of ESG data.

Vanguard does not provide any guarantee with respect to the quality, accuracy, or completeness of the information provided by Morningstar, MSCI, or FTSE.

1 Parent Benchmark refers to the broad market index from which the fund's benchmark is derived, prior to the screening of any environmental, social, and governance criteria.

2 Refer to the fund's prospectus for more information on the applicable ESG screening methodology.

Investment risk information

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

Past performance is not a reliable indicator of future results.

Funds investing in fixed interest securities carry the risk of default on repayment and erosion of the capital value of your investment and the level of income may fluctuate. Movements in interest rates are likely to affect the capital value of fixed interest securities. Corporate bonds may provide higher yields but as such may carry greater credit risk increasing the risk of default on repayment and erosion of the capital value of your investment. The level of income may fluctuate and movements in interest rates are likely to affect the capital value of bonds.

The Funds may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

Some funds invest in securities which are denominated in different currencies. Movements in currency exchange rates can affect the return of investments.

For further information on risks, please see the 'Risk Factors' section of the prospectus on our website at <https://global.vanguard.com>.
