Management Charges

Ongoing Charges Figure* 0.20%

*The Ongoing Charges Figure (OCF) covers administration, audit, depository, legal, registration and regulatory expenses incurred in respect of the Funds. When you invest with any fund manager, you pay a number of charges, starting with the Annual Management Charge (AMC) which covers the fund manager's costs of managing the fund. The AMC plus ongoing running costs and other operational expenses make up the fund's total 'ongoing charges figure'.

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the Standard and Poor’s 500 Index (the “Index”).
- The Index is comprised of large-sized company stocks in the US.
- The Fund attempts to: 1. Track the performance of the Index by investing in all constituent securities of the Index in the same proportion as the Index. Where not practicable to fully replicate, the fund will use a sampling process. 2. Remain fully invested except in extraordinary market, political or similar conditions.

Vanguard U.S. Equity Index Common Contractual Fund

B GBP Accumulation Shares

Performance summary

GBP—Vanguard U.S. Equity Index Common Contractual Fund
Benchmark — Standard and Poor’s 500 Index - Represents price-plus-net cash dividend return. Net cash dividend equals reinvested dividends less 30% withholding tax.

Annualised performance**	1 month	Quarter	Year to date	1 year	3 years	5 years	10 years	Since inception
Fund (Net of expenses)	-0.62%	8.37%	11.15%	10.10%	16.12%	15.22%	15.87%	16.35%
Benchmark	-0.60%	8.43%	11.35%	10.32%	16.36%	15.45%	16.10%	16.70%

**In this document the performance displayed for the Fund(s) and therefore relative performance to the benchmark index may be impacted by swing pricing. The NAV of a Fund may swing according to subscription/redemption activity so that transaction costs caused by these cashflows are not borne by the existing holders in a Fund. The benchmark index is not affected by swing pricing and therefore you may see tracking difference between the performance of the Fund and the benchmark.

Performance and Data is calculated on closing NAV as at 30 November 2025.

Past performance is not a reliable indicator of future results.

Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Performance figures include the reinvestment of all dividends and any capital gains distributions. The performance data does not take account of the commissions and costs incurred in the issue and redemption of shares. Basis of fund performance is NAV to NAV. Basis of index performance is total return. All performance is calculated in GBP, net of fees.

Key investment risks

The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events. Movements in currency exchange rates can adversely affect the return of your investment.

Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

Please also read the risk factors section in the prospectus and the Key Investor Information Document, both of which are available on the Vanguard website.

Vanguard U.S. Equity Index Common Contractual Fund

B GBP Accumulation Shares

Data as at 30 November 2025 unless otherwise stated.

Characteristics	Fund	Benchmark
Number of stocks	503	503
Median market cap	£303.0B	£303.0B
Price/earnings ratio	28.3x	28.3x
Price/book ratio	5.2x	5.1x
Return on equity	27.0%	27.0%
Earnings growth rate	23.9%	23.8%
Turnover rate	-9%	—
Equity yield (dividend)	1.1%	1.1%
Quoted Historic Yield	1.00%	—

The PTR (Portfolio Turnover Rate) approach considers the total security purchases and sales, the total subscriptions and redemptions and the average net assets of the fund to calculate the turnover figure. Data as at 30 September 2025.

Top 10 holdings	
NVIDIA Corp.	7.5%
Apple Inc.	7.1
Microsoft Corp.	6.2
Alphabet Inc.	5.8
Amazon.com Inc.	3.8
Broadcom Inc.	3.2
Meta Platforms Inc.	2.4
Tesla Inc.	2.1
Berkshire Hathaway Inc.	1.6
Eli Lilly & Co.	1.5

Top 10 approximately equals 41.2% of net assets

Data as at 30 November 2025

Weighted exposure

Sector categories are based on the Global Industry Classification Standard system ("GICS"), except for the "Other" category (if applicable), which includes securities that have not been provided a GICS classification as of the effective reporting period.

Glossary for fund characteristics

The fund characteristics section above contains a number of metrics that professional investors use to value individual stocks against a market or index average. These metrics can also be used to value and compare funds to the market by taking the average of all the stocks held in the fund and comparing them to those of the fund's benchmark index. We've provided a definition of the terms used for your convenience.

Median market cap (capitalisation) looks at all companies in a mutual fund portfolio and calculates the mid point market capitalisation. Market capitalisation represents the aggregate value of a company's stock.

Price earnings ratio (P/E ratio) of a stock is the price paid for a share divided by the annual profit earned by the firm per share. A stock with a price of £10 a share, and earnings last year of £1 a share, would have a P/E ratio of 10.

Price book ratio compares a stock's market value to its book value (the accounting value of a stock). It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

Return on equity is a measure of a company's profitability that reveals how much profit a company generates with the money shareholders have invested.

Earnings growth rate is a measure of growth in a company's net income (what remains after subtracting all the costs from a company's revenues) over a specific period (often one year). Earnings growth can apply to previous periods or estimated data for future periods.

Turnover rate is the total value of sales and purchases of stocks by a fund, less any subscriptions and redemptions monies into or out of a fund, expressed as a percentage of the fund's average value, over a specified period (usually one year).

Equity yield characteristics reflects distributions declared over the past twelve months as a percentage of the mid-market unit price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

Investment risk information

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

Past performance is not a reliable indicator of future results.

Investments in smaller companies may be more volatile than investments in well-established blue chip companies.

The Funds may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

For further information on risks, please see the 'Risk Factors' section of the prospectus on our website at <https://global.vanguard.com>
