

Vanguard FTSE Developed All Cap ex U.S. Index ETF (CAD-hedged)

Management Discussion of Fund Performance

Investment Objective and Strategies

The investment objective of Vanguard FTSE Developed All Cap ex U.S. Index ETF (CAD-hedged) (the "ETF") is to track, to the extent reasonably possible and before fees and expenses, the performance of a broad global equity index that focuses on providing coverage of developed markets, excluding the U.S., which is hedged to the Canadian dollar. Currently, this ETF seeks to track the FTSE Developed All Cap ex US Hedged to CAD Index (or any successor thereto) (the "Index"). The Index is a market capitalization-weighted index that is designed to represent the performance of large-, mid- and small-capitalization stocks in developed markets, excluding the United States, with the foreign currency exposure of the Index hedged back to the Canadian dollar.

To achieve its investment objective, the ETF employs a "passive management," or "indexing," investment approach designed to track the performance of the Index by investing primarily in a U.S.-domiciled fund ("U.S.-domiciled Vanguard Fund") managed by The Vanguard Group, Inc. ("VGI"), that seeks to track the Index. The ETF also uses derivative instruments to seek to hedge the foreign currency exposure of the securities included in the Index back to the Canadian dollar. In the alternative or in addition to investing in the U.S.-domiciled Vanguard Fund, the ETF may invest its assets directly in stocks that make up the Index.

Risk

The risks associated with an investment in the ETF remain as discussed in the ETF's most recent prospectus. During the period that began January 1, 2025, and ended June 30, 2025, there were no changes to the ETF that materially affected the overall risk level associated with an investment in the ETF.

Results of Operations

For the six months ended June 30, 2025, the ETF returned 9.50%, after fees and expenses, compared with the 9.14% return of its benchmark, the Spliced FTSE Developed ex US Index Hedged in CAD (the "Benchmark"), and the 9.14% return of the FTSE Developed All Cap ex US Hedged to CAD Index. The ETF's management fees and other operating expenses reduced performance relative to the Benchmark by 0.11 percentage points. Deviations from the Benchmark returns are a result of the wrapped fund structure; this can be broken down into market price differential, foreign withholding tax, FX rate timing differences between ETF and Benchmark and expense ratio differences between the US- and Canadian-domiciled products.

Recent Developments

There are no recent developments to report.

This interim management report of fund performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the ETF. You can obtain a copy of the interim financial report or annual financial statements at your request, and at no cost, by calling 1-877-410-7275, by writing to us at 22 Adelaide Street West, Suite 2500, Toronto, ON M5H 4E3 or by visiting our website at vanguard.ca or SEDAR+ at sedarplus.com. You may also contact us using one of these methods to request a copy of the ETF's proxy voting policies and procedures, proxy voting disclosure record and/or quarterly portfolio disclosure.

Related Party Transactions

Vanguard Investments Canada Inc. (the “Manager”) is the manager, trustee, portfolio manager and promoter of the ETF, and is entitled to receive a management fee for its services that is paid by the ETF to the Manager (see “Management Fees” below).

From time to time, the Manager may, on behalf of the ETF, enter into transactions or arrangements with or involving certain persons or companies that are related to the Manager when, in the discretion of the Manager, it would be in the best interests of the ETF to do so. The purpose of this section is to provide a brief description of any transaction or arrangement with or involving the ETF and a related party.

Sub-Advisor

Vanguard Global Advisers, LLC (“VGA”), an affiliate of the Manager, has been retained by the Manager to act as sub-advisor to the Manager in connection with the ETF. As sub-advisor, VGA manages the investment portfolio of the ETF, provides analysis and makes investment decisions, subject to continuing oversight by the Manager. VGA is a registered investment advisor in the United States with offices based in Valley Forge, Pennsylvania. As compensation for its services as sub-advisor, VGA is entitled to receive a portion of the management fee that is paid by the ETF to the Manager.

With respect to the continuing oversight of the affiliate by the Manager, the Manager has relied on a positive recommendation and standing instruction that it has received from the ETF’s Independent Review Committee (“IRC”). The standing instruction requires the Manager to comply with its current policy and procedures on monitoring services provided by the sub-advisor of the ETF and to report periodically to the IRC, describing each instance in which the Manager relied on the standing instruction and its compliance with the policy and procedures.

Management Fees

As set out under Related Party Transactions, the Manager is the manager, trustee, portfolio manager and promoter of the ETF. As compensation for its services, the Manager is entitled to receive a maximum annual management fee of 0.20%, payable monthly, calculated based on the daily net asset value (“NAV”) of the ETF.

The ETF invests primarily in a U.S.-domiciled fund (“U.S.-domiciled Vanguard Fund”) managed by VGI, the indirect parent of the Manager, which is entitled to receive a fee for acting as manager of the U.S.-domiciled Vanguard Fund. To ensure that there is no duplication of fees chargeable in connection with the ETF and its investment in the U.S.-domiciled Vanguard Fund, the management fee payable by the ETF to the Manager as set out above is reduced by the aggregate of the management fee payable by the U.S.-domiciled Vanguard Fund to VGI and certain expenses of the U.S.-domiciled Vanguard Fund that are paid directly by the U.S.-domiciled Vanguard Fund (together, the “U.S.-domiciled Vanguard Fund total expense ratio”). The U.S.-domiciled Vanguard Fund total expense ratio is embedded in the market value of the U.S.-domiciled Vanguard Fund shares in which the ETF invests.

The major services paid for out of the management fee include fees payable to the custodian, registrar and transfer agent, as well as fees payable to other service providers, including the index providers, retained by the Manager.

The Manager may, in its discretion, agree to charge the ETF and/or certain unitholders a reduced management fee as compared with the management fee that it otherwise would be entitled to receive, provided that the amount of the reduced management fee is distributed periodically by the ETF to the unitholder as a management fee distribution. Any reduction will depend on a number of factors, including the amount invested, the NAV of the ETF and the expected amount of account activity. Any tax consequences of a management fee distribution will generally be borne by the unitholder who receives the distribution.

Financial Highlights

The following tables show selected key financial information about the ETF and are intended to help readers understand the ETF's financial performance for the periods indicated.

The ETF's Net Assets Per Unit¹

Net assets at end of period	\$60.58	\$55.91	\$51.14	\$44.63	\$49.16	\$42.77

1 The financial highlights are derived from the financial statements prepared in accordance with IFRS Accounting Standards, which allow net assets to be calculated based on the last traded market price for financial assets and financial liabilities where the last traded price falls within the day's bid-ask spread. There may be differences between the net assets calculated for the purpose of processing unitholder transactions and the net assets attributable to holders of redeemable units used for financial statement reporting purposes as at June 30, 2025, December 31, 2024, 2023, 2022, 2021, and 2020.

2 Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period.

3 Distributions were paid in cash or certain distributions were reinvested in additional units of the ETF. Immediately following such reinvestment, the number of units outstanding was consolidated so that the net asset value per unit following the distribution and reinvestment is the same as it would have been if the distribution had not been paid. Actual distributions may vary slightly owing to rounding.

1 This information is provided as at June 30, 2025, and December 31 of the year shown, as applicable.

2 Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) and includes a proportionate share of underlying Vanguard funds expenses, for the stated period and is expressed as a percentage of daily average net asset value during the period.

3 Annualized.

4 The ETF's portfolio turnover rate indicates how actively the ETF's sub-advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher a portfolio's turnover rate in a year, the greater the trading costs payable by the ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.

5 The trading expense ratio represents total commissions and other portfolio transaction costs expressed as a percentage of daily average net assets during the period. If, during the period, the ETF charged a fee to designated broker/dealers to offset the impact of certain transaction costs associated with a purchase or redemption of units of the ETF, the transaction costs used in the trading expense ratio would have been reduced by those fees.

Past Performance

The ETF's performance information assumes that all distributions made by the ETF in the periods shown were reinvested in additional units of the ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that, if applicable, would have reduced returns or performance. How the ETF has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-Year Returns

The following bar chart shows the ETF's annual performance for the years shown and illustrates how the ETF's performance has changed from year to year.

The chart shows in percentage terms how much an investment made on the first day of the period would have increased or decreased by the last day of the period.
