The UCITS Regulations, which transposed Directive 2009/65/EC (the “**UCITS Directive**”) into Irish law, provide that no more than 10% of a UCITS’ net asset value may be invested in transferable securities or money market instruments issued by the same body (the “**10% Limit**”).

However, the UCITS Regulations also provide that for a UCITS that has an investment policy to replicate the composition of an index (i.e. an index tracking fund), such as the Sub-Funds, the 10% Limit is raised to 20% and may be further raised to 35% in exceptional market circumstances. Accordingly, where permitted by the Central Bank, such UCITS may continue to have exposure to an index which has constituents issued by the same body that account for up to 20% (or 35% in exceptional market circumstances) of the relevant tracked index (the “**Increased Diversification Limit**”).

It is proposed to update the Prospectus in order to clarify that the Sub-Funds may avail of the Increased Diversification Limit in accordance with applicable UCITS rules.

Revised Prospectus

A revised Prospectus has been submitted to the Central Bank. Once noted by the Central Bank, the revised Prospectus will be made available on:
