

Non-UCITS Retail Scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Vanguard LifeStrategy Global 20% Equity Fund (the "Fund")

A sub-fund of Vanguard LifeStrategy Funds ICVC

A GBP Accumulation Shares

ISIN: GB00BVPLDV60

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to provide a return on your investment (through an increase in the value of, and income received from, assets held by the Fund) within a pre-defined asset allocation over the medium term (3 years or more).
- The Fund is actively managed and seeks to achieve its investment objective by investing at least 90% of its assets by value in a diversified portfolio of passive funds that seek to track the performance of an index, and which are managed or operated by the ACD or other companies in the Vanguard Group of Companies ("Associated Schemes").
- The pre-defined asset allocation for the Fund means that it is intended that the Fund will invest: (1) approximately 20% of its assets by value in Associated Schemes which provide exposure to shares of companies worldwide; and (2) approximately 80% of its assets by value in Associated Schemes which provide exposure to government and corporate bonds and other similar fixed income investments worldwide.
- This Fund is part of a range of funds. Within this range, a fund which invests more in Associated Schemes that provide exposure to shares of companies will typically be riskier than a fund which invests more in Associated Schemes that provide exposure to government and corporate bonds and other similar fixed income investments.
- In addition to the pre-defined asset allocation, the Investment Adviser will aim to maintain a strategic asset allocation that is designed using research conducted by Vanguard. The Fund does not aim to outperform this strategic asset allocation.
- The Fund may also invest up to 10% of its assets directly in transferable securities (such as shares, bonds and other similar fixed income investments, which will generally be components of the indices tracked by the Associated Schemes), money market instruments and deposits.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is appropriate for medium-term investment. You should have an investment horizon of at least 3 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: <https://fund-docs.vanguard.com/Vanguard-LifeStrategy-Funds-ICVC.pdf>

For further information about the objectives and investment policy of the Fund, please see Appendix 1 of the Vanguard LifeStrategy Funds ICVC Prospectus (the "Prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and bonds can be affected by factors such as stock market movements, interest rates, credit spreads and volatility. Other driving factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors and Performance" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.20%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their distributor and or adviser.

Because the share class was launched less than one calendar year ago, ongoing charges are estimated based on the expected total of charges. It excludes portfolio transaction costs.

For further information about charges please see the sections entitled "Buying Shares", "Redeeming Shares", "Charges and Expenses", "Dilution Adjustment" and Appendix 1 of the Prospectus on our website at <https://global.vanguard.com>
