Vanguard Active EUR Corporate Bond UCITS ETF (the "Fund")

A sub-fund of Vanguard Funds PLC

(EUR) Accumulating Shares

ISIN: IE000Y090178

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund aims to provide a higher total return (capital growth plus income) than the Bloomberg Euro Corporate Index after the fees and expenses of the Fund.
- The Fund employs an "active management" strategy in aiming to outperform the Index and in doing so, the Investment Manager will follow distinct approaches in managing the Fund's assets.
- The Fund will invest in bonds, including fixed and floating rate issues, primarily made up of EUR denominated corporate debt from issuers with a credit rating of the equivalent of Baa3 and above ("investment grade") by Moody's or another independent rating agency or, which are determined to be of comparable quality by the Investment Manager. Issuers of these securities may be located in any country, including emerging markets.
- The Investment Manager may in its discretion restrict the extent to which the Fund's holdings deviate from the Index constituents on a security selection and fixed income sector basis. The Fund may take active fixed income sector views with the focus on bond specific selection. The extent to which the Fund can outperform the Index may be restricted by constraints applied by the Investment Manager which limit the potential volatility of the difference between the return of the Fund and the return of the Index. Such constraints may change or be removed from time to time at the Investment Manager's discretion and depending on market environments.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth, and for investment purposes. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The base currency of the Fund is EUR.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may invest in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 3 years.
- Income from the ETF Shares will be reinvested and reflected in the price of shares in the ETF.
- Portfolio transaction costs will have an impact on performance.
- ETF Shares in the Fund can be bought or sold on a daily basis (save on certain bank / public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus or in a separate Supplement). ETF Shares are listed on one or more stock exchange(s). Subject to certain exceptions set out in the Prospectus, investors who are not Authorised Participants may only buy or sell ETF Shares through a company that is a member of a relevant stock exchange at any time when that stock exchange is open for business. A list of the days on which shares in the Fund cannot be bought or sold is available on https://fund-docs.vanguard.com/holiday-calendar-vanguard-funds-plc-ETFs.pdf

Risk and reward profile

Lower risk ◄——————————► Higher risk

Typically lower rewards — Typically higher rewards

1	2	**3**	4	5	6	7

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 3 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

  - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.

  - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

  - Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Currency risk. Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging is not guaranteed to completely eliminate currency risk.
- Call risk. During periods of falling interest rates, issuers of callable bonds may call (repay) securities with higher coupons or interest rates before their maturity dates.
- Credit risk. The chance that a bond issuer will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at https://global.vanguard.com
