

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### Vanguard Emerging Markets Bond Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

### Institutional Plus GBP Hedged Accumulation Shares

ISIN: IE00BKLWXR20

Manager: Vanguard Group (Ireland) Limited ("VGIL")

## Objectives and investment policy

- The Fund seeks to provide total return while generating a moderate level of income by investing primarily in bonds of issuers in emerging market countries.
- The Fund employs an "active management" strategy, aiming to outperform the J.P. Morgan EMBI Global Diversified Index (the "Index"), over the cycle, and in doing so, the investment manager will follow distinct approaches in managing the Fund's assets.
- The Fund invests in fixed income securities of various maturities, yields, and qualities. Under normal circumstances, the Fund will invest at least 80% of its assets in fixed income securities of issuers that are tied economically to emerging market countries. The Fund seeks to have a majority of its assets denominated in or hedged back to the U.S. dollar but has the ability to invest in bonds denominated in a local currency on an unhedged basis. Emerging market bonds include sovereign debt securities, which include fixed income securities that are issued or guaranteed by foreign governments or their agencies, authorities, political subdivisions or instrumentalities, or other supranational agencies, as well as debt securities issued or guaranteed by foreign corporations and foreign financial institutions.
- The Fund may take active fixed income sector and security selection views with the focus on bond specific selection. The investment manager may apply constraints which limit the potential volatility of the Fund relative to the Index and such constraints may change or be removed from time to time at the investment manager's discretion and depending on market environments.
- The Investment Manager may in its discretion restrict the extent to which the Fund's holdings deviate from the Index constituents on a security selection and fixed income sector basis.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth, and for investment purposes. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

- The base currency of the Fund is USD.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange rates, where the Fund invests in securities denominated in currencies other than the listing currency, but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, the performance (see "Performance") of this share class is shown against the currency hedged version of the Index.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 3 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Subject to certain exceptions set out in the Prospectus, Shares in the Fund can be bought or sold or exchanged on a daily basis (save on certain bank / public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus or in a separate Supplement) by submitting an application in writing. A list of the days on which shares in the Fund cannot be bought or sold is available on <https://fund-docs.vanguard.com/holiday-calendar-vanguard-investment-series-plc-irish-funds.pdf>

## Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

**The risk and reward indicator does not take account of the following risks of investing in the Fund:**

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.
- Call risk. During periods of falling interest rates, issuers of callable bonds may call (repay) securities with higher coupons or interest rates before their maturity dates.

**For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>**
